

Tuesday 25th February 2020

Dear parents and careers,

On **Friday 6th March 2020**, we will kick start our WCPS science week!

This aligns with British science week - a 10-day programme with thousands of events running throughout the whole of the UK with the aim of celebrating science, engineering, technology and maths.

This year, we have invited a very special guest – **Professor Bubbleworks** – who will be attending our school on Friday 6th March. The team have designed a really exciting and engaging assembly as well as workshops which are in line with the British Science week theme – ‘Our diverse planet’. All throughout the following week, children will be busy doing follow-up activities, exploring a variety of scientific skills.

Each child will participate in a **whole school assembly at 9:05 (all welcome to attend)**, as well as an individual class workshop during the day. Having spoken to the team, I know it will be a very hands-on and memorable experience for our children!

As this event involves an outside company, there is a **£5 charge for each pupil** in the school. This cost will cover all of the specialised equipment, resources and staff that children will have a chance to access throughout the day.

In order to thank you for your contribution, **children can come to school dressed as a scientist** on Friday 6th March! The class that raises the most money will also be rewarded with an extra playtime – with an outdoor science activity!

Thank you for your continuous support.

Miss Figueiredo
Science coordinator
